B.B. Huria

Across

- 2 Action performed by any structure. (8)
- 6 "P" in "IPL" stands for _____. (8)
- 7 Technique that allows a computer to address a HD larger than 528 MB. (3)
- 8 BER stands for Bit XXXXX Rate. (5)
- 9 Interconnection system between a microprocessor and attached devices. (3)
- 10 Hash function for checksum. (3)
- 11 Name of a signal that data has been received successfully. (3)
- 13 Inter-IC bus, a de-

facto solution for embedded applications. (3)

- 14 A sub-layer of OSI concerned with managing traffic. (3)
- 15 A generic term applied to coding schemes that allow for the correction of errors in one or more bits of a word of data. (3)
- 17 Make synchronous. (4)
- 18 Info exchange via PCs. (3)
- 19 A self-maintaining routing protocol for wireless networks. (3)

Down

- 1 A language most frequently used for writing CGI scripts. (4)
- 3 "U" in "ACU" stands for _____. (4)
- 4 First "C" in "ECC" stands for _____. (10)
- 5 "I" in "DDI" stands for _____. (9)
- 6 The state where an unrecoverable error has occurred. (5)
- 9 A character name that uniquely identifies a driver's routines to the kernel. (6)
- 12 Pronounced as "scuzzy". It refers to the small computer system

interface that allows peripherals to communicate with a computer's operating system. (4)

- 16 Memory locations providing communication between the device and the driver. (3)
