B.B. Huria

## Across

- 1 AQL stands for Acceptable Quality \_\_\_\_\_. (5)
- 2 'M' in 'HTML'. (6)
- 5 Any 'M' in 'MIMO', an antenna technology that promises to deliver up to 8x coverage and up to 6x speed of current 802.11g networks. (8)
- 6 Light waves just outside the visible spectrum, slightly longer than those visible to the human eye. (8)
- 7 A test pattern consisting of vertical and horizontal lines

## Down

- 2 used for converging a colour display device. (10)
- 3 A special version of an EEPROM that can be rewritten while in its functioning environment, instead of having to be removed and reprogrammed in a special device. (5,6)
- 4 Darkest visible surface created by the absorption of all incident light and colour. (5)
- 5 F' in 'FPS'. (6)
- 6 'L' in 'LCD'. (6)
- 7 A screen with a flat, dull surface for even reflection over wide viewing angles. (5,5)
- 8 The ratio of the measured number of TV lines to the pixel count of a fixed pixel video device. (4,6)
- 9 'B' in 'NAB', the body that sets standards for US broadcast stations. (12)
- 10 First 'D' in 'DMD'. (6)
- 11 \_\_\_\_\_ equalisation: The method of altering the

frequency response of a video amplifier to compensate for high frequency loss in cables that it feeds. (5)

- 9 In video, it is a means of controlling the timing of an event with respect to other events. (4)
- 10 A basic measure of reliability for repairable items, described as the number of hours that pass before a component, assembly, or system fails. (4)
