B.B. Huria

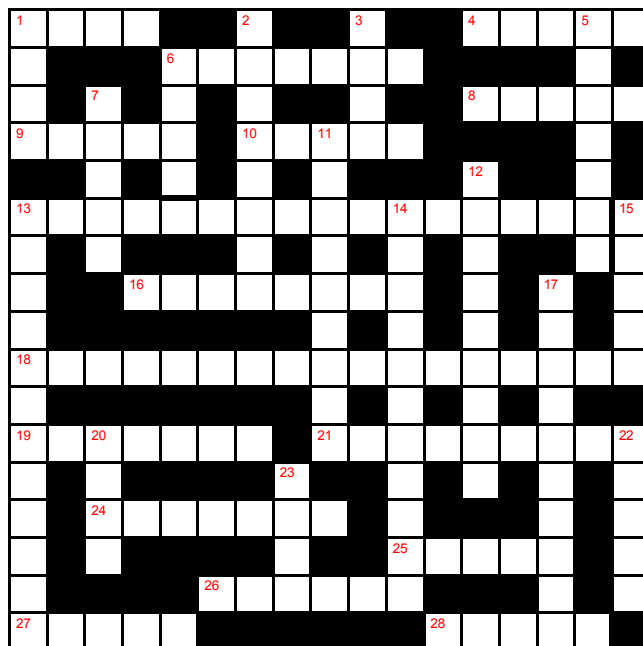

Across

- 1 Hexagonal compartment of a honey comb (4)
- 4 Bee ____: A brush or whisk broom used to remove bees from the hive (5)
- 6 A cloth or wire netting for protecting the beekeeper's head and neck from stings (3,4)
- 8 Braula ____: Scientific name of a wingless fly commonly known as the bee louse (5)
- 9 Bees in the stage of eggs, larvae, or pupae, not yet emerged from their cells (5)
- 10 Any hive body portion, where surplus honey is stored (5)
- 13 The three stages through which a bee passes before reaching maturity: egg, larva, and pupa (3,13)
- 16 A metal device used to open hives, pry frames apart, and scrape wax and propolis from the hive parts (4,4)
- 18 Constriction of the muscles surrounding the bronchial tubes of a human, caused by hypersensitivity to venom (12,5)
- 19 The method of swarm control that separates the queen from most of the brood within the same hive (7)
- 21 Queen cells usually found on the bottom of the combs before swarming (5,4)
- 24 Posterior or third region of the body of a bee enclosing the honey stomach, true stomach, intestine, sting, and reproductive organs (7)

- 25 The egg producing part of a bee (5)
- 26 The male reproductive cell bodies produced by the anthers of flowers, collected and used by honeybees as their source of protein, essential enzymes and vitamins (6)
- 27 Exotic or unknown bees are not allowed ____ into the hive (5)
- 28 Alighting ____: Small projection at the entrance of the hive (5)

Down

- 1 A group of hexagonal adjoining beeswax cells, manufactured by honeybees to store honey, pollen and brood (4)
- 2 About 1/4" to 3/8" gap between surfaces of hive (3,5)

- 3 Man-made dwelling for bees (4)
- 5 Principal sugar found in nectar (7)
- 6 Hive ____: A wooden box which encloses the frames (4)
- 7 A sweet viscid material produced by bees from the nectar of flowers (5)
- 11 The mouthparts of the bee that form the sucking tube or tongue (9)
- 12 A clarifying tank between the extractor and honey pump for removing the coarser particles of comb introduced during extraction (5,4)
- 13 Volatile, almond-smelling chemical that drives bees out of honey supers (12)
- 14 Transfer of pollen from the anthers to the stigma of flowers (11)
- 15 ____ honey - thick
- 17 An infertile or unmated laying queen (5,5)
- 20 Wine made of fermented honey and water (4)
- 22 Second stage of bee metamorphosis (5)
- 23 A cloth or wire netting for protecting the beekeeper's face from stings (4)
