

# Computer\_science\_15x15\_2008-10-04

B.B. Huria

## Across

- 1 Computer memory space used to temporarily store data (6)
- 3 Most popular word processor program (4)
- 6 A sequence of instructions that a computer can interpret and execute (8,7)
- 9 A powerful operating system developed at the Bell Telephone Laboratories (4)
- 11 A Unix-like free operating system descended from AT&T UNIX via the Berkeley Software Distribution (BSD) branch (7)
- 12 A commonsense set of rules intended to increase the probability of solving some problem (9)
- 14 A popular variant of unix (5)
- 16 To move text or graphics up or down, or left or right, in order to see parts of the file that cannot fit on the screen (6)
- 17 What you see is what you get; displaying on screen how things will look when printed (7)
- 18 This was the standard, most common operating system before Windows arrived (3)
- 19 No Clue
- 22 A binary digit (3)
- 24 A general-purpose programming language created by Sun Microsystems (4)
- 25 Server side scripting language useful for

- creating dynamically generated web pages, which can interface with a database (3)
- 26 A storage device that handles data so that the next item to be retrieved is the item most recently stored (LIFO) (5)
  - 27 The movement of a read/write head to a specific data track on a disk (4)
- ## Down
- 1 A second, safe copy of a file, letter or data (6)
  - 2 Protocol that allows users to copy files between their local system and any system they can reach on the network (3)
  - 3 Wireless Application Protocol (3)
  - 4 A computer file containing relatively transient data about a particular data processing task (11,4)

- 5 Decipher the information represented within a bar code symbol (6)
- 7 GUI stands for Graphical \_\_\_\_\_ Interface (4)
- 8 Any computer that is hooked up to a computer network (5)
- 10 A graphic symbol, usually representing a file, folder, disk or tool (4)
- 11 Formula Translator programming language developed principally for mathematical problems (7)
- 13 Language, used for managing and querying databases (3)
- 15 A program designed for general support of the processes of a computer (7)
- 16 A metalanguage suitable for describing all kinds of markup languages, including HTML (4)
- 17 The hypermedia document presentation system that can be accessed over the Internet using software called a Web browser (3)
- 20 One of the circular magnetic paths on a magnetic disk that serve as a guide for writing and reading data (5)
- 21 It defines the properties of the object and the methods used to control the object's behaviour (5)
- 22 Unit used for measuring line speed, the number of information units transmitted per second (3)
- 23 A computer system that acts as an

information host for  
remote computer  
systems (3)
