B.B. Huria

Across

1 The merging of database information (such as names and addresses) with a letter template in a word processor. (9)

6 AppleTalk Remote Access. A protocol that provides system-level support for dial-in (modem) connections to an AppleTalk network. (3)

7 A process in which frequently accessed data is kept on hand, rather than constantly being from the place where it is stored. (7)

10 Hewlett Packard. (2)

11 Formatting codes used in HTML documents. (4)

14 A term used to define image resolution instead of ppi. ____ 12 indicates 12 pixels per millimeter. (3)

15 Gigabyte. A unit of data storage size which represents 10^9 (one billion) characters of information. (2)

17 Slang term for someone who regularly reads newsgroup, BBS, or mailing list discussions, but rarely participates in them. (6)

19 Continuously variable signals or data. (6)

20 Charge-coupled device. An integrated, micro-electrical light sensing device built into some image capturing devices. (3)

22 Elimination of intermediate film and printing plates by the direct transfer of image data to printing cylinders in the press. (6-2-5)

25 Advanced Interactive Executive - IBM's version of Unix. (3)

26 Internet Protocol

is the standard that allows dissimilar hosts to connect to each other through the Internet. (2)

27 Corporation for Research and Educational Networking. This organization was formed in October 1989, when BITNET and CSNET (Computer + Science NETwork) were combined under one administrative authority. that one platform (type of computer). (4)

Down

1 The heart, soul, and brains of a computer. (11)

2 Internet Relay Chat. A program that allows you to carry on "live" conversations with people all over the world by typing messages back and forth across the Internet. (3)

3 Rels (recorder elements) per inch. A measurement of the number of discrete steps that exposure units in imagesetting devices can make per inch. (3)

4 An object-oriented programming language to create executable content (i.e. self-running applications) that can be easily distributed through networks like the Web. (4)

5 Wide Area Information Server. ____ is best at searches for various sources of academic information that has been indexed based on content. (4)

8 A type of audio format used in the World Wide Web. (2)

9 The lightest tones in an image. A spectral ____ is a bright, reflected light source. (9)

11 A series of messages with the same subject, consisting of an original message and all the replies that follow. (6)

12 (Grey Component Replacement) A technique for replacing all the neutral tones of an image with an appropriate amount of black. (3)

13 A system that your computer uses to organize files on the basis of specific information. (9)

16 Bits Per Second is the unit used for measuring line speed, the number of information units transmitted per second. (3)

18 This often refers to a 2-dimensional array of CCD elements. (6)

21 To insert information from the Clipboard. (5)

23 Common Gateway Interface. A method of running an executable script or program from a Web server. (3)

24 Request For Comments; technical note series which began in 1969 describing DARPA and Internet research and development, particularly in the areas of protocol design and internetworking. (3)
