**Across**

- 1 The state of matter characterised by low density and viscosity, great expansion or contraction with changes in pressure and temperature besides the ability to diffuse readily. (3)
- 3 The land bordering a usually large body of water. (5)
- 6 A narrow channel of the sea joining two larger bodies of water. (6)
- 7 A point or extension of land jutting out into water as a projecting point. (4)
- 8 A body of water

smaller than a lake, but much larger than a puddle. (4)

- 11 An isolated relatively flat-topped natural elevation; bigger than a butte and smaller than a plateau. (4)
- 12 An inlet of the sea or other body of water usually smaller than a gulf. (3)
- 14 Land where grass or grasslike vegetation grows and is the dominant form of plant life. (10)
- 16 A man made bank usually of earth constructed to control or confine water. (4)

- 17 A deep red garnet used as a gemstone. (6)

**Down**

- 2 A source of water issuing from the ground. (6)
- 3 A narrow strip of land that juts out into the sea. (4)
- 4 A lump or mass of hard consolidated mineral matter. (4)
- 5 A series of rocks or ridge of sand or coral, at or near the surface of the water. (4)
- 6 A young tree, shorter than an adult and not yet producing seeds. (7)
- 9 The wide part of a
- 10 A great body of salt water of second rank more or less landlocked. (3)
- 11 A wetland without trees and shrubs. (5)
- 12 The bottom of a waterway. (3)
- 13 Any of the the sides of a river. (4)
- 15 Plant juices. (3)

river where it nears the sea; fresh and salt water mix. (7)
