

2003-03-06_Mathematics_11x11

B.B. Huria

Across

- 1 A number to be divided by another number. (8)
- 5 Ratio of the circumference to the diameter of a circle (3.1415926...) (2)
- 6 The ratio of two quantities to be divided. (8)
- 7 A number that when multiplied by itself equals a given number. (6,4)
- 10 Space occupied by any two-dimensional figure. (4)

- 11 A geometric element that has position but no extension. (5)

- 12 A parallelogram with four right angles. (9)

Down

- 2 A mathematical notation indicating the number of times a quantity is multiplied by itself. (8)
- 3 The number by which a dividend is divided. (7)

- 4 Derived by dividing the sum of terms by the number of terms. (4)

- 5 Optical device having a triangular shape and made of glass or quartz; used to deviate a beam or invert an image. (5)

- 6 The area enclosed by two perpendicular radii of a circle. (8)

- 8 The relative magnitudes of two quantities (usually expressed as a quotient). (5)

- 9 A length (straight or curved) without breadth or thickness. (4)
