

Physics_15x15_2008-10-18

B.B. Huria

Across

- 2 One of the building blocks of elementary particles. (5)
- 4 The electrical connection that leads to the earth. (6)
- 7 The most distant point of an orbit from the earth. (6)
- 8 The fourth state of matter. (6)
- 11 Converting AC to DC. (13)
- 14 The degree of hotness or coldness of a body or environment. (11)

Down

- 16 The unit of potential difference. (4)
- 17 The property of a body that causes it to have weight. (4)
- 19 Measurement of the intensity of a light source. (10)
- 20 Unit of measurement of electrical current. (6)
- 21 The subjective sensation of hearing something. (5)

Down

- 1 The smallest discrete quantity of some physical property that a system can possess. (7)
- 3 A device that controls amount of light admitted. (8)
- 5 The unit of electrical resistance. (3)
- 6 Inventor of the barometer. (10)
- 9 Negatively charged ion. (5)
- 10 Glass device used for focussing light. (4)

- 12 A line joining points of equal temperature. (8)
- 13 Ability to reflect or refract light without spectral colour separation. (11)
- 15 Discoverer of x-rays. (8)
- 16 Space without any matter. (6)
- 18 The positive electrode. (5)
