

Oct 16 - WORLD ANAESTHESIA DAY

Across

- 1 Local anaesthesia is a method of providing pain relief over a small _____ of the body. (4)
- 3 Very rarely, local anaesthesia may cause allergic reactions and temporary breathing _____. (8)
- 6 Nitrous oxide is also called _____ gas. (8)
- 7 _____ relief during the surgical operation is the prime objective of anaesthesia. (4)
- 8 Ever since the discovery of the properties of nitrous oxide, the growth of this specialized branch of medicine has been a slow yet _____ one. (6)
- 11 Widespread research on atmospheric gases during the 18th century sowed the seeds for the development of the branch of Anaesthesiology. (3)
- 12 The main _____ of anaesthesiology is to provide pain relief to the patient during the operation. (3)
- 13 It is extremely rare for anaesthesia to _____ allergic reactions or other side effects. (5)
- 15 Allergic reactions are noticed in extremely rare _____ of anaesthesia. (5)
- 16 Any procedure that is painful like pulling tooth can be done using _____ anaesthesia. (5)
- 18 Ever since the discovery of the properties of nitrous oxide, the growth of this specialized branch of medicine has been a _____ yet steady one. (4)
- 19 Pain _____ during a medical operation is the motto of Anaesthesiology. (6)
- 21 Inhalation of nitrous oxide (laughing gas) results in pain reduction as well as attainment of an elated _____. (5)
- 22 Any procedure that is painful like _____ tooth can be done using local anaesthesia. (7)
- 23 Local anaesthesia is a method of providing pain relief over a small area of the _____. (4)
- anaesthesia is usually used for minor procedures or even minor surgery. (4)
- 10 Extremely rarely, local anaesthesia may cause allergic _____. (9)
- 14 Local anaesthesia is a method of providing pain relief over a _____ area of the body. (5)
- 17 Inhalation of nitrous oxide (laughing gas) results in pain reduction as well as attainment of an _____ state. (6)
- 18 In simplistic terms, local anaesthesia is a numbing medication, that is injected into the _____. (4)
- 19 Presently, the cases of allergic reactions to anaesthesia are extremely _____. (4)
- 20 It takes a few minutes for the anaesthetic drug to have its _____ effect. (4)

Down

- 1 In local anaesthesia cases, _____ reactions are extremely rare. (8)
- 2 Around 1800, it was found that inhalation of nitrous _____ resulted in pain reduction in addition attainment of an elated state. (5)
- 4 General anaesthesia is nothing more than putting a patient to sleep until the surgery is _____. (4)
- 5 Discovery of anaesthetic drugs is one of the most significant events in the history of _____. (8)
- 9 The local _____ of
